

H-1 SPECIAL UNIVERSAL PENETRATING OIL and LUBRICANT

- ◆ **Registered with NSF for use in applications where incidental food contact may occur**

H-1 Special Universal Penetrating Oil and Lubricant is formulated with highly refined food-grade white oils for use in industrial machinery where incidental food contact from lubricants may occur. All of the components comply with FDA 21 CFR 178.3570. May also be used in food processing or packaging plants, meat, poultry or fish processing plants, beverage and bottling plants, dairies and creameries, candy and snack plants and pharmaceutical plants. Applications include but are not limited to chains, valves, conveyors, trolley hooks, rollers, linkages, slides and more.

- ◆ **Leaves a lubricant film for lubrication and corrosion protection**

Equipment in food processing plants is exposed to very high levels of cleaning and washing down. Texas Refinery's H-1 Special Universal Penetrating Oil and Lubricant is resistant to the moisture and remains adhesive enough to prevent washing off. Therefore, a film of lubricant provides the protection necessary to prevent corrosion, and ultimately the wear caused by the corrosion.

- ◆ **Lubricant film adheres, even in the presence of fruit juice acids**

Fruit juice acids can wash off many lubricant films, but that is not the case with H-1 Special Universal Penetrating Oil and Lubricant. The H-1 Special Universal Penetrating Oil and Lubricant strongly adheres to all surfaces, even in fruit juice applications, to provide the protective shield to the metal surfaces. This protective shield protects against moisture, rust and corrosion.

- ◆ **Rapidly penetrates and dissolves most rust, gums and varnish**

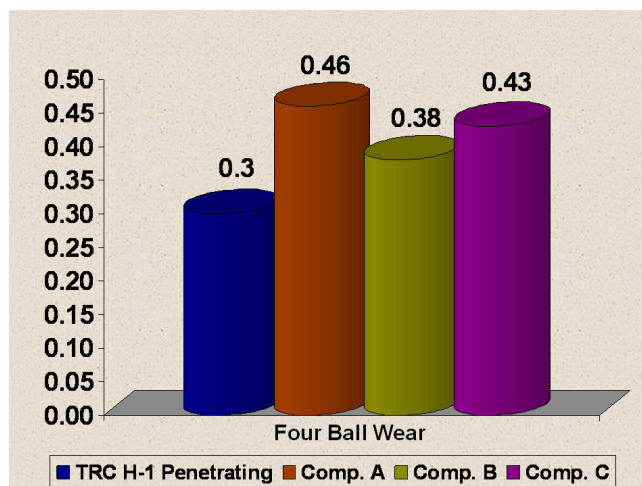

H-1 Special Universal Penetrating Oil and Lubricant penetrates pin linkage points and helps protect against metal-to-metal contact between chains and sprockets. If rust, gums or varnish are present, the H-1 Special Universal Penetrating Oil and Lubricant will go to work quickly and help dissolve these unwanted deposits from the surface.

**Made In The
U.S.A.
Since 1922**

♦ Versatile and Reliable

H-1 Special Universal Penetrating Oil allows for a quick spray that provides a film of protection and acts as a powerful rust preventative. H-1 Special Universal Penetrating Oil is great to use in tight places or in public places where a high solvent or high petroleum penetrating oil would not be preferred. The pleasant smelling, foaming formula allows for only a little to be used when compared to other products. Places such as hospitals, municipal buildings, hotels, schools, and other public environments experience a noticeable difference when using this penetrating oil versus a high-odor alternative. The added protection and ability to prevent flash rusting makes H-1 Special Universal Penetrating Oil ideal for food industries such as processing rooms where the stainless-steel tables can flash rust after washing down the surface, before the next shift begins.

H-1 Special Universal Penetrating Oil offers more lubrication than competitive products, as shown by the smaller wear scar diameter in the Four Ball Wear Test.

SPECIFICATIONS

H-1 SPECIAL UNIVERSAL PENETRATING OIL AND LUBRICANT

Product Code #	6550
ISO Grade	46
NSF H1	142826
Flash Point	145°F
Viscosity	
212°F, SUS	48.8
40°C, cSt	46.5
4 Ball Wear Scar	D4172
75°C, 1200 rpm	.30
40 Kg, mm	

Contains no known allergens and is not manufactured with any nut or soy oils or derivatives or any milk ingredients or derivatives.
