

# RUST REMOVER

## USER BENEFITS:

- **EASY TO USE**
- **NON-FLAMMABLE**
- **REUSABLE**
- **A METAL CONDITIONER**
- **CONTAINS DEGREASING AGENTS**

RUST REMOVER is specially formulated to remove the maximum amount of rust quickly and with minimum effort. It is a liquid wash-off type remover that reacts with oxides formed on metal surfaces to dissolve unsightly and destructive rust and leave the surface clean.

## RUST REMOVER Is Easy To Use

RUST REMOVER can be applied by brushing, spraying or dipping. It is packaged at full strength. Dilute with water to suit the job at hand. RUST REMOVER should be used in vessels and equipment of lined steel, glass or appropriate plastic containers.

## RUST REMOVER Is Non-Flammable

RUST REMOVER is non-flammable and may be heated to accelerate the chemical action and shorten the time required for cleaning. It does not contain any muriatic acid and does not have the fumes associated with muriatic acid.

## RUST REMOVER Is Reusable

RUST REMOVER is reusable. As long as there is any reactivity, you have cleaning ability. It is a versatile liquid with a long shelf life.

## RUST REMOVER Is A Metal Conditioner

RUST REMOVER is a perfect metal conditioner prior to application of paints and/or corrosion preventatives.

## RUST REMOVER Contains Degreasing Agents

RUST REMOVER contains degreasing agents which remove traces of protective oils, allowing efficient rust removal. Heavy deposits of greases must be removed prior to applying RUST REMOVER.

## RUST REMOVER Is An Ideal Stock Item For:

Refineries  
Plating Shops  
Government Installations  
Metal Fabricators  
Marine Salvage Yards  
Auto Dealers  
Welding Shops  
Auto Accessories  
Canneries  
Boiler Cleaning  
Irrigation Districts  
Metal Can Factories  
Schools  
Highway Departments  
Maintenance Firms

# OTHER APPLICATIONS FOR RUST REMOVER

(SEE INSTRUCTIONS FOR USE)

- **CLEANING STEEL, ALUMINUM, NICKEL, STAINLESS STEEL, COPPER, BRASS AND TIN**
- **CLEANING COOLING SYSTEMS**
- **REMOVING HARD WATER STAINS**
- **CLEANING ELECTRICAL CONTACTS**
- **GALVANIZING**
- **CLEANING CHROME SURFACES**
- **CLEANING TOOLS AND MACHINES**
- **CLEANING SPORTING EQUIPMENT**  
Boats, Trailers, Camp Stoves, Reels

**Instructions for using RUST REMOVER are mailed to Customer along with the invoice.**

## SPECIFICATIONS

### RUST REMOVER

Product Code #4600

(Meets or Exceeds MIL-C-10578C)

RUST REMOVER is a concentrated corrosion removing and metal conditioning compound. Its intended use is to remove rust from ferrous metal surfaces and provide a slight etching action for ferrous and non-ferrous metals, promoting the adhesion of paint or corrosion preventatives. RUST REMOVER should be diluted with water before use.

|                                      |  |
|--------------------------------------|--|
| Color                                | Clear To Straw   |
| Dilution Rate                        | Dilute according to instructions and need . . . normally 50/50 |
| Application                          | Brush, Spray or Dip  |
| Viscosity, Brookfield, cps           | 30   |
| pH                                   | 0.4  |
| Phosphoric Acid Content, gms/100 ml. | 68 Minimum   |
| Flash Point, TCC and COC             | None   |

Handling Information: For safe handling of the product, read the Safety Data Sheet (SDS).
